FREQUENTLY ASKED QUESTIONS

What is Unity Certified User (UCU)?

Unity Certified User (UCU) is the entry-level certification that demonstrates knowledge of Unity software and skills to create interactive, 2D and/or 3D experiences. Three UCU certifications are currently available – Programmer, VR Developer, and Artist. Differences in these certifications are outlined below.

- Unity Certified User: Programmer validates that the certified candidates have the basics of C# programming within Unity software. It also certifies the candidates' abilities to create 2D and 3D experiences within Unity.
- Unity Certified User: VR Developer validates candidates' abilities to create VR experiences and programs within Unity software.
- Unity Certified User: Artist validates that certified candidates have the basics of 2D and 3D digital artistry within Unity software. Certified candidates can successfully create digital art and other assets and implement them into virtual experiences.

What are the benefits of earning Unity Certified User certification?

Skills to create immersive experience and work with AR/VR are in high demand. Unity Certified User serves as a tangible, industry-recognized proof to your technical and practical skills that are crucial to careers in this or related fields.

Certification is also valuable in bridging the gap between academia and industry, as it helps educators keep a curriculum relevant to today's job market.

How is the certification earned?

Each Unity Certified User certification is earned by passing a 50-minute exam that is administered through a Certiport Authorized Testing Center (CATC). The exams are designed by industry experts, and are psychometrically validated, allowing for an authentic assessment of job-ready skills.

What question formats are used in the exams?

The exams consist of scenario-based, selective response questions, including true or false, multiple choice, hot spot mapping, and matching.

FREQUENTLY ASKED QUESTIONS

Where and how can I take the exams?

Exams are delivered in person and online through Certiport Authorized Testing Centers (CATC). To register for an exam,

locate and contact your nearest CATC at *portal.certiport.com/Locator*, or reach out to a Certiport Solution Provider in your country at *certiport.pearsonvue.com/Solution-providers*.

If you belong to an academic institution, you can easily enroll your institution to be a Certiport Authorized Testing Center at no cost. To learn more, visit *www.certiport.com/go*.

What happens once I pass an Unity Certified User exam?

Upon passing an exam, you will receive an official certificate through your Certiport.com account and an invitation from Credly to claim a digital badge.

Please share your achievement by adding the digital badge to your portfolio, resume, LinkedIn, and other social profiles.

Do Unity certifications expire?

Yes, certifications become non-current three years after the date of issue.

Educator Information

How can I offer Unity Certified User to my students?

Educators can offer exams by registering their institution as a Certiport Authorized Testing Center (CATC). To learn more, visit *www.certiport.com/go*.

How can I prepare my students for certification?

Educators can prepare students for Unity certification through year-long, semester-long, and/or intensive courses.

Certiport offers learning materials, like Unity Certified User Courseware or CertPREP Practice Tests for UCU, to help educators integrate the certification into their curriculum. A wide range of free resources are also available through Unity.

Is there a bulk purchase option for educators?

Institutions can purchase the Unity Certified User Site License that includes unlimited access to Unity exams and practice tests. Additional learning materials are also available for bulk purchase.

Additional Information

If you are an academic institution in the United States, you can request a free classroom kit to promote the UCU certification program. Request the kit at *www.Certiport.com/programkit*.

You can also attend the Certiport annual educator conference, CERTIFIED, to learn, network and collaborate with a community of educators who are currently using certification in their classroom and courses. Learn more at *www.Certiport.com/CERTIFIED*.
