KICKSTART A CREATIVE CAREER

The future belongs to those who create. Whether it's to inform, persuade, entertain, or inspire, success in the digital age means communicating in visually rich and interactive ways. With a firm grasp on the world's most powerful creative tools, Adobe Certified Professionals are ready to make their mark.

Adobe Certified Professional, delivered by Certiport, is the industry-recognized certification that demonstrates knowledge of Adobe Creative Cloud software and essential concepts for digital media careers. Each exam is integrated with an Adobe app and designed by experts to assess in-demand, job-ready skills.

Creators

Creative Cloud is the industry standard across digital media and design fields. Mastering the tools of the trade allows creators to bring ideas to life with greater ease, enhancing their creativity and productivity. Adobe Certified Professionals stand out to employers and clients who seek not just artistic talent but the technical know-how and ambition to get things done right.

Educators

Adobe Certified Professional is uniquely valuable for fostering creativity and employability in the classroom. The exams offer real-world standards that keep a curriculum relevant to industry and actionable data to assess learning. Educators also witness a boost in confidence and focus as students learn to communicate in new ways and make progress toward their dreams.

Employers

In the digital age, the key to winning the hearts and minds of customers is eye-catching content and on-screen experiences. Adobe Certified Professional makes it easy for employers to identify creators who are skilled in the industry-leading creative software and ready to produce quality work that sets the organization apart.

Administrators

Integrating industry-grade software and certification into a curriculum serves to bridge the gap between classroom learning and career success. Adobe Certified Professional gives institutions the rigorous standards and measurable results that they need to build highly effective digital media programs that open doors for students.

Specialty Credentials

Specialty credentials in Visual, Video, and Web Design are awarded to individuals who demonstrate valuable cross-product knowledge by completing a set of two certifications.

PROFESSIONAL VISUAL DESIGN

Adobe Certified Professional in Visual Design

Adobe Photoshop
and either Adobe Illustrator or
Adobe InDesign

PROFESSIONAL VIDEO DESIGN

Adobe Certified Professional in Video Design

Adobe Premiere Pro
and either Adobe Photoshop or

Industry Credentials For Digital Creators

Portfolios and demo reels are critical for showcasing creative talent, but they don't always tell the full story. With Adobe Certified Professional, creators demonstrate the practical skills and knowledge that are necessary for success on the job.

Adobe and Certiport have worked closely with subject matter experts to identify the foundational competencies that can make or break a career opportunity in digital media fields. To reach this level of proficiency, 150 hours of instruction and hands-on experience is recommended.

To locate a Certiport Authorized Testing Center or learn how to set one up at your institution, visit **certiport.com/go.**

Learn

Certiport offers a variety of learning materials designed to help educators integrate certification seamlessly into a curriculum, as well as resources for individual learners. These engaging materials include videos, textbooks, web-based activities and more.

Practice

CertPREP is Certiport's performance-based test preparation tool that closely resembles the exam environment. It is powered by GMetrix and includes extensive reporting and insight features to assist educators in identifying specific student needs.

Certify

Candidates test their knowledge of core features and concepts through interactive questions and realistic live-in-the-app tasks. Each exam is integrated with Creative Cloud and rigorously tested for validity and relevance. The 50-minute duration allows educators to administer exams within a class period.

Sound Familiar?

In June 2021, the Adobe Certified Associate program was renamed Adobe Certified Professional to more accurately reflect the skill level that is demonstrated through these certifications and expected in today's creative industries.

Certiport is the official exam development and delivery partner for the Adobe Certified Professional program for Adobe Creative Cloud.
