

Intro to Cloud Computing

Microsoft Certified Fundamentals

The Microsoft Certified Fundamentals certification exams will put your students on the path to becoming the cloud computing consultants and admins of the future.

The future of computing is in the cloud, and the cloud is growing—fast! Whether it's data storage, web hosting, CRM management, or online productivity tools, companies are looking for trained individuals who understand the benefits of the cloud.

These entry-level exams are the first tier in Microsoft's role-based certification program and will put students on the path to advance into Microsoft's Associate and Expert level exams, and prepare them to fill the most in-demand jobs.

AZ-900	Azure Fundamentals
---------------	--------------------

The Azure Fundamentals exam is a good introduction to cloud services for those who are interested in becoming data scientists, AI engineers, Azure developers and administrators, or anyone interested in the benefits of Azure.

MS-900	Microsoft 365 Fundamentals
---------------	----------------------------

The Microsoft 365 Fundamentals exam is a good introduction to the cloud services that are available to help businesses collaborate more freely. It's best suited for those becoming a desktop, teamwork, or security administrator.

PL-900	Microsoft Power Platform Fundamentals
---------------	---------------------------------------

This exam is intended for users who aspire to improve productivity by automating business processes, analyzing data to produce business insights, and acting more effectively by creating simple app experiences.

AI-900	Microsoft Azure AI Fundamentals
---------------	---------------------------------

This exam is an opportunity to demonstrate knowledge of common machine learning (ML) and artificial intelligence (AI) workloads and how to implement them on Azure. It is intended for candidates with both technical and non-technical backgrounds. Candidates for this exam should have foundational knowledge of ML and AI concepts and related Microsoft Azure services.

DP-900	Microsoft Azure Data Fundamentals
---------------	-----------------------------------

This exam is intended for candidates beginning to work with data in the cloud. Candidates for this exam should have foundational knowledge of core data concepts and how they are implemented using Microsoft Azure data services, and should be familiar with the concepts of relational and non-relational data, and different types of data workloads such as transactional or analytical.

SC-900	Microsoft Security, Compliance and Identity Fundamentals
---------------	--

This certification is targeted to those looking to familiarize themselves with the fundamentals of security, compliance, and identity (SCI) across cloud-based and related Microsoft services. Candidates should be familiar with Microsoft Azure and Microsoft 365 and want to understand how Microsoft security, compliance, and identity solutions can span across these solution areas to provide a holistic and end-to-end solution.

MB-910	Microsoft Dynamics 365 Fundamentals (CRM)
---------------	---

This exam covers the features and capabilities of Microsoft Dynamics 365 customer engagement apps. Candidates of this exam should have general knowledge of or relevant working experience in an Information Technology (IT) environment. They should also have a fundamental understanding of customer engagement principles and business operations.

MB-920	Microsoft Dynamics 365 Fundamentals (ERP)
---------------	---

This exam covers the features and capabilities of Microsoft Dynamics 365 finance and operations apps. Candidates of this exam should have general knowledge of or relevant working experience in an Information Technology (IT) environment. They should also have a fundamental understanding of financial principles and business operations.
